**VA OD:** Dcc20/40-. PHNI. **OS:** Dcc20/25+.

**IOP:** App **OD:** 21,22,25 **OS:** 22,34

4:31 PM, 5:44 PM

**OCT Macula: Findings OD:** Reason For Testing: Initial Evaluation. No Evidence of Macular Edema. No Evidence of Subretinal Fluid. Findings Consistent with Drusen and RPE Changes. **Findings OS:** Reason For Testing: Initial Evaluation. Comparative Data: Improved Compared to Prior Study. No Evidence of Macular Edema. No Evidence of Subretinal Fluid.

**Impression:**

**Primary:** POAG, Moderate OU. Nuclear Sclerosis OU. Epiretinal Membrane OD > OS.

**Plan:**

**Discussion:** POAG, Moderate OU. The IOP is above the target range. Recommended for patient to restart Vyvulta ou ASAP. Nuclear Sclerosis OU. Patient understands condition, prognosis and need for follow up care. The cataracts are creating some visual symptoms that are tolerable at this time. Epiretinal Membrane OD > OS. Instructed to call immediately if any new distortion, blurring, decreased vision or eye pain. Recommended a retina consultation and possible vitrectomy. Patient aware after vitrectomy Cataract progression may happen sooner than later.

**Specialty Meds:**

- Vyvulta 0.024% Ophthalmic Solution 1 drop every evening Both Eyes **Comments:** stopped 2 wks ago

**Follow Up:** Dr. Ratchford PRN.
